

Bamini Keyboard Layout பாமினி கீபோர்டு அமைப்பு

Base character at the bottom of each key · Shift character at the top-left · small grey label = physical key · unicodebamini.com

Digits and most punctuation keep their ASCII meaning — Bamini is a Latin-script encoding, so English text can be mixed in. The four keys that produce only vowel signs when typed alone (h, p, P, and the ; pulli) are shown with a dotted circle; in real text they attach to the preceding consonant. Dotted keys have no Tamil mapping.

How to Type — Key Sequences

Every cluster below is produced by the live converter at unicodebamini.com and verified against the Bamini font files.

க + every vowel sign (key f)

TAMIL	KEYS
க்	f;
க	f
கா	fh
கி	fp
கீ	fP
கு	F
கூ	\$
கெ	nf
கே	Nf
